

My favourite Shopping Centre

I don't like shopping much but if I need to do some. I would like to shop in Sham Shui Po. My favourite shopping centre in the district is the Golden Computer Centre.

The shopping Centre is located in front of Sham Shui Po Station near exit D2 and the reason why I like shopping there is that the quality of items there are top-notch, the electronic products are up-to-date and they have some of the best games. You can do things other than shopping but we can test alpha or beta reasons of up-coming games, but I don't have a problem with it. I usually buy electronic devices or hardware to upgrade my personal computer. I usually go alone but sometimes I may go there with my friends. There aren't any facilities because of the small maze-like structure. There are some special services available that help to assemble personal computers for customers. The service is really important because the regular customers are skillful enough to assemble by themselves.

This shopping centre is almost crowded all the time. The customers are usually teenagers and gamers. The reason why they like shopping there is that they can get whatever they want. I would recommend this shopping centre to my friends because this shopping centre is really amazing.
