

Aliens have ruled the world

One day it was a usual day in Hong Kong crowded places traffic and cars everywhere. It was all just like a normal day until something happened that had annoyed the whole planet Earth. Mary and her friends went shopping to Central. When they arrived at Central, people were screaming and taking the transport to go back home but Mary and her friends didn't care. They continued shopping. They went to take the MTR to another destination until they saw a TV. They were all panicking and didn't know what to do. They saw that Aliens have landed in Hong Kong and knew that it could be dangerous. In the news, it kept saying that now planet Earth can be in danger. Mary and her friends found a shelter to stay in all the transport were closed. They saw several spaceships landing. They were all shocked. They all stayed calmly there,

A few of the aliens came out of the spaceship. One of Mary's friend was brave enough to go talk to the aliens. They knew it could be dangerous so they all went together. They were walking towards where the aliens were but suddenly more came and which is more dangerous where they were talking towards the planet. Mary and her friends knew that they could never let this happen. The aliens were ready to shoot. Mary went to the aliens and asked them "Why are you doing this?" They replied "We want to take over every single planet in the whole universe." Mary said "Why Earth?" There are people lining here kids and families. No one wants to die yet.

The aliens felt bad but didn't care they started killing everyone and more and more spaceships were landing they started making some of the humans their slaves. That was now Hong Kong is ruined. They had destroyed all buildings and made labs all around Hong Kong and every other country. No one was able to save the planet but people at least tried. The universe is only Aliens now. That is how aliens ruled the whole world. Everyone was helpless and useless at this point.
